

# Global MedOps Command Speaking Overview

---

## Chester “Chet” Shermer, MD, FACEP

---

Founder, Global MedOps Command

Board-certified emergency physician, educator, and medical operations leader

Prepared for Every Emergency. Educated for Every Challenge.

---

## What audiences can expect

---

Global MedOps Command speaking and advisory sessions are designed for clinical leaders, physicians, EMS organizations, and military medical audiences that need practical guidance rather than generic theory. Sessions focus on decision-ready insights, implementation realism, and clear next steps your team can use immediately.

## Core topics

---

- Emergency medicine AI strategy and practical clinical adoption
- Simulation-based education for physicians, EMS teams, and military medical learners
- Operational readiness, transport medicine, and team decision support
- Clinical workflow improvement, implementation guardrails, and leadership communication

## Sample audiences

---

- Hospitals and health systems

- Residency programs and academic departments
- EMS agencies, flight teams, and regional education groups
- Military medical units and operational training organizations

## Available formats

---

- Keynote presentations
- Interactive workshops
- Webinar sessions
- Advisory and strategic consulting

## Best fit for

---

Organizations looking for a physician-led perspective on emergency medicine, AI adoption, simulation strategy, operational readiness, and education that reflects the pressure of real clinical environments.
